Childhood TB Diagnostic policies

Childhood TB treatment policies

More detailed information can be accessed from the website to the SUFT e-portal ([suft.stopTB.org](http://suft.stopTB.org))

### SUFT 2023 SURVEY KEY FINDINGS:

The survey primary finding shows progress in diagnostic TB policies uptake, however there are still challenges in covering the gap of undiagnosed and thus untreated people with TB still remained. In particular, the weak alignment of national pediatric TB policies with internationally recognized raises significant concern.
