

Category and Product-level Procurement and Delivery Planning Guide

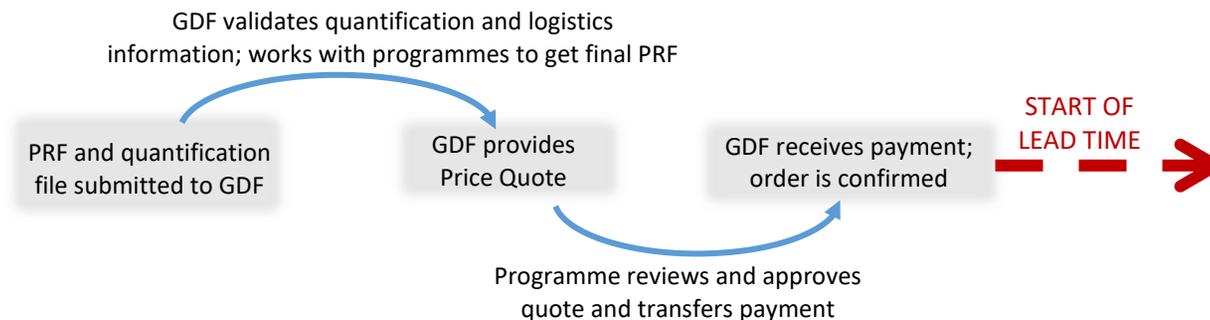

Indicative Lead Times

16 October 2019

This document lays out indicative lead-times for planning purposes for TB products procured via the Stop TB Partnership’s Global Drug Facility (STBP/GDF).

Procurement and delivery lead-time information is the time from order confirmation and receipt of payment by STBP/GDF to delivery to country. This information is provided at the category and detailed product level and is indicative based on current market knowledge to ensure on-time delivery and best value procurement. Below is a high-level overview of the STBP/GDF ordering process from initial submission of a procurement request form (PRF) until the final order confirmation and payment – when the lead time starts.

High-Level Overview of STBP/GDF Ordering Process

Users of this guide should account for country-specific processes related to finalizing the PRF, accepting quotes, and transferring payment when planning procurements.

Category and Product-level Procurement and Delivery Planning Guide

Indicative GDF lead-times for planning purposes for TB medicines and diagnostics

Select the year and month products are required to be delivered to country to find the year and month the order must be confirmed and paid

Latest indicative month the order must be confirmed and paid for reliable supply and best value

Category level indicative procurement planning timeline guide: <u>from the date the payment is received by STBP/GDF and order is confirmed</u> <i>Note that there may be variations within the category - please consult the attached detailed product level list for more specific guidance</i>		2020												2021

Note: Information above is dependent on procurement volumes, country importation requirements, selected INCOTERMS, manufacturer production schedules, and availability of products in GDF's stockpile. Actual lead times will be confirmed at the time of receipt of payment and order confirmation.

* Wide variation - please consult the detailed product-level guidance

Category and Product-level Procurement and Delivery Planning Guide

Category / Product	Lead Time (after payment received and order confirmed)		
	120 days	180 days	250 days
TB Medicines			
Latent TB Infection (LTBI) in Adults			
Isoniazid 300mg tablet uncoated 672		x	
Rifampicin 150mg tablet film coated 100	x		
Rifampicin 300mg tablet film coated 100	x		
Rifampicin/Isoniazid 150/75mg tablet film coated 336		x	
Rifapentine 150 mg tablet film coated 24			x
Latent TB Infection (LTBI) in Children			
Isoniazid 100mg tablet dispersible 100		x	
Rifampicin/Isoniazid 75/50mg tablet dispersible 84		x	
First-Line Drugs (FLDs) for Drug-Susceptible TB in Adults			
Rifampicin/Isoniazid/Pyrazinamide/Ethambutol 150/75/400/275mg tablet film coated 672		x	
Rifampicin/Isoniazid/Ethambutol 150/75/275mg tablet film coated 672		x	
Rifampicin/Isoniazid 150/75mg tablet film coated 336		x	
Ethambutol 400mg tablet film coated 672		x	
Isoniazid 300mg tablet uncoated 672		x	
Pyrazinamide 400mg tablet uncoated 672		x	
Pyrazinamide 500mg tablet uncoated 672		x	
Pyridoxine 50mg tablet film coated 50			x
Pyridoxine 100mg tablet uncoated 250			x
Rifabutin 150 mg capsule 100		x	
Rifampicin 150mg tablet film coated 100	x		
Rifampicin 300mg tablet film coated 100	x		
Rifapentine 150 mg tablet film coated 24			x
Category I & III Patient kits (Type A)		x	
First-Line Drugs (FLDs) for Drug-Susceptible TB in Children			
Rifampicin/Isoniazid/Pyrazinamide 75/50/150mg tablet dispersible 84		x	
Rifampicin/Isoniazid 75/50mg tablet dispersible 84		x	
Ethambutol 100 mg tablet dispersible 100		x	
Isoniazid 100mg tablet dispersible 100		x	
Pyrazinamide 150mg tablet dispersible 100		x	
Second-Line Drugs (SLDs) for Drug-Resistant TB in Adults			
Levofloxacin 250 mg tablet film coated 100	x		
Levofloxacin 500 mg tablet film coated 100	x		
Levofloxacin 750 mg tablet film coated 100	x

Category / Product	Lead Time (after payment received and order confirmed)		
	120 days	180 days	250 days
TB Medicines			
Second-Line Drugs (SLDs) for Drug-Resistant TB in Adults			
Moxifloxacin 400 mg tablet film coated 100		x	
Bedaquiline 100 mg tablet uncoated 188		x	
Linezolid 600 mg tablet film coated 100		x	
Clofazimine 100 mg capsule / tablet 100			x
Cycloserine 250 mg capsule 100	x		
Terizidone 250 mg capsule 100	x		
Delamanid 50 mg tablet film coated 672			x
Imipenem/Cilastatin 500/500mg powder for IV infusion/injection - 10 vials		x	
Meropenem 1g powder for IV infusion/injection - 10 vials		x	
Amoxicillin/Clavulanate 500/125mg tablet film coated 100	x		
Amoxicillin/Clavulanate 875/125 mg tablet film coated 100	x		
Amikacin 500mg solution for injection - 10 ampoules		x	
Streptomycin Sulphate 1g powder for injection - 10 vials		x	
Ethionamide 250mg tablet film coated 100		x	
Prothionamide 250mg tablet film coated 100		x	
PAS acid sachet, equivalent to 4g of aminosallyclic acid, enteric coated granules - 30 sachets	x		
PAS sodium sachet, equivalent to 4g of aminosallyclic acid, powder for oral solution - 30 sachets	x		
PAS sodium sachet, equivalent to 4g of aminosallyclic acid, enteric coated granules - 25 sachets		x	
Second-Line Drugs (SLDs) for Drug-Resistant TB in Children			
Levofloxacin 100mg tablet dispersible 100		x	
Moxifloxacin 100mg tablet dispersible 100		x	
Clofazimine 50mg capsule / tablet 100			x
Cycloserine 125mg mini-capsule 100		x	
Ethambutol 100 mg tablet dispersible 100		x	
Pyrazinamide 150mg tablet dispersible 100		x	
Ethionamide 125mg tablet dispersible 100		x
