## Global Fund's Catalytic Investments for TB

Finding the people with TB who are missed by current systems

## Strategic Initiative for TB

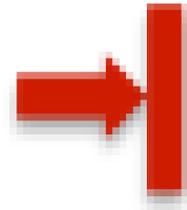

Finding the people with TB who are missed by current systems

Strategic Initiative

GOAL  
1.5 Million  
more people with TB  
notified in 2019  
compared to 2015

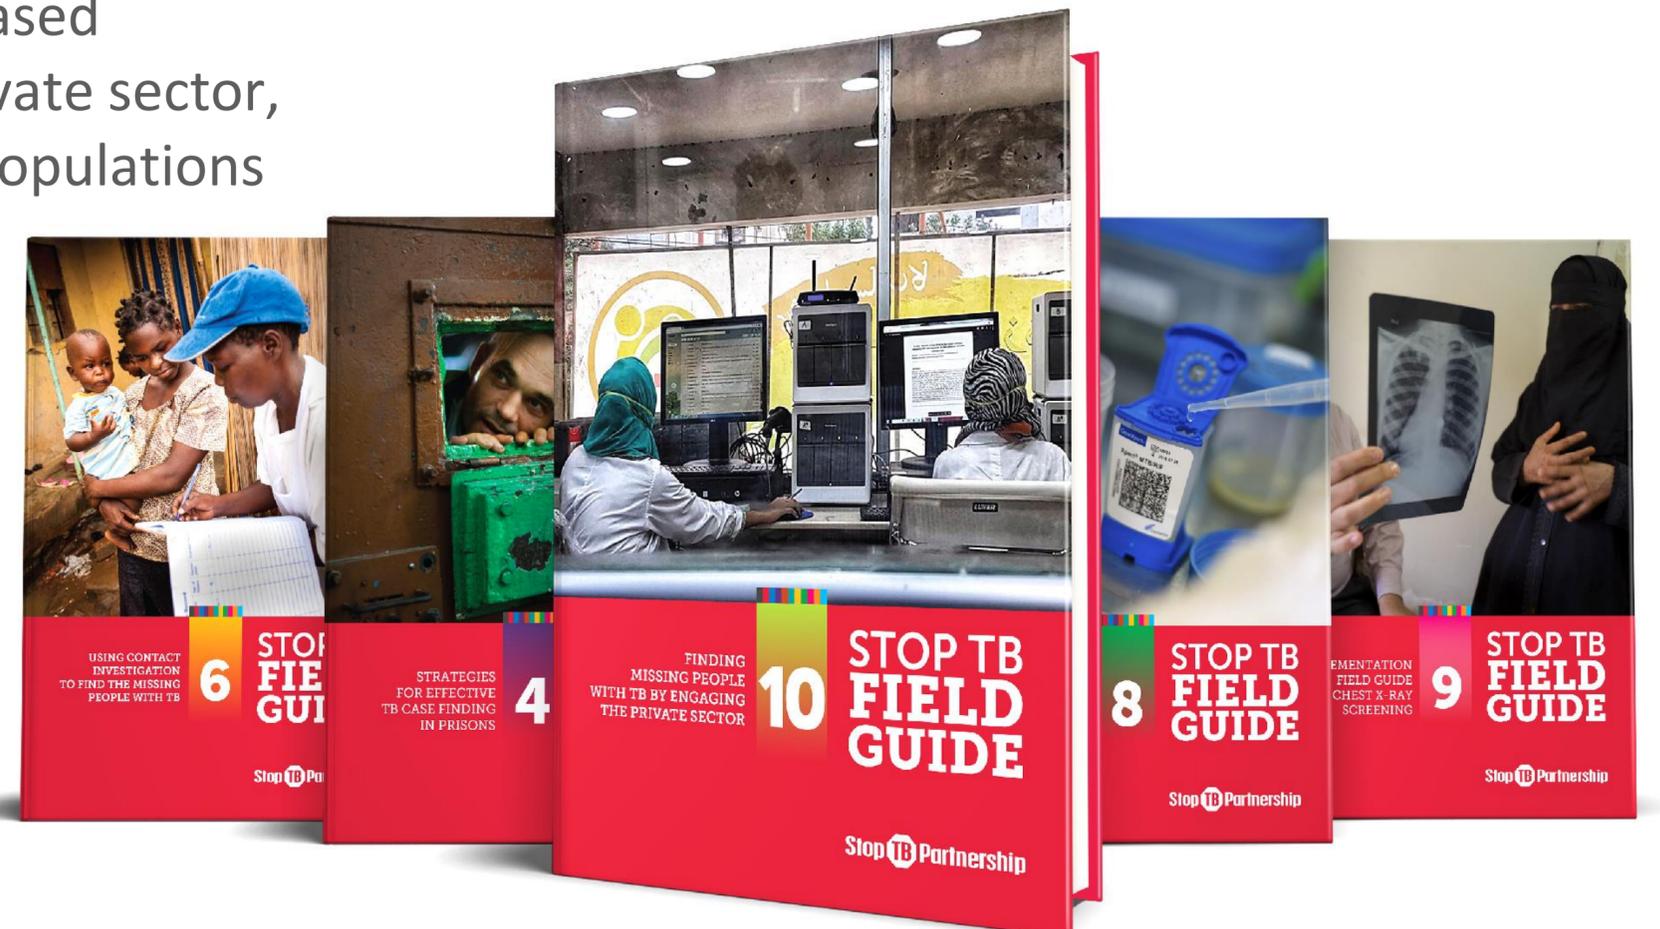

- Tool Development: ‘How to’ Reach People who are Missed
- South to South Capacity Building and Technical Support –using Data for Action
- Country Deployment of CRG Tools and Assessments
- Community-Based Monitoring
- Demand generation through CFCS
- Advocacy and Knowledge Dissemination

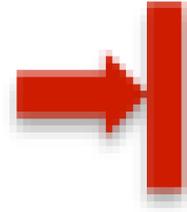

Coordinated with key partners of TB Situation Room

## Tool Development: How to Reach People with TB who are Missed

- Developed with writing, inputs and reviews from over 40 different partners
- Based on experiences from TB REACH and other partners work
- Not normative, rather how to design, implement and evaluate different approaches
- Community-based case finding, facility-based screening, contact investigation, CXR, private sector, prisons, childhood TB, laboratories, key populations

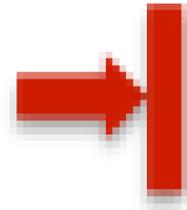

## South to South Capacity Building and Technical Support – Using Data for Action

- Assistance with applications and reprogramming
- South to South sharing visits with Nigeria/Pakistan, Philippines/India
- Local capacity with TB REACH and CFCS partners
- Joint missions with GF, WHO, USAID + others
- STP, IRD Global, KIT, external M&E team
- Support to track progress for different case detection approaches and interventions ➡ Data for Action
- Assist with sub-national data analysis (e.g. MATCH)
- Support for People-Centered Framework
- Coordinated with key partners of TB Situation Room

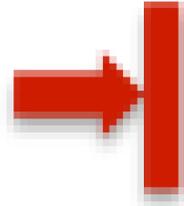

## Country Deployment of CRG Tools and Assessments

### Gender and Legal Environment Assessments

- 13 countries supported – through co-financing between Global Fund and USAID
- 8 countries completed the assessments and are preparing for the implementation of the recommendations (operational plan)
- 5 countries are at different stages of assessment – completing mid-2019

The collage features several key documents and images:

- Legal Environment Assessments for Tuberculosis: An Operational Guide** (July 2017), published by UNDP and Stop TB Partnership. The cover shows a group of people holding a red handprint sign.
- Data for Action for Tuberculosis Key, Vulnerable and Underserved Populations** (Working Document, September 2017), published by Stop TB Partnership. The cover shows three individuals.
- Gender assessment tool for national HIV and TB responses** (Towards gender-transformative HIV and TB responses), published by Stop TB Partnership and UNAIDS. The cover is blue with a female symbol icon and a photo of three people.

## Community-Based Monitoring

*OneImpact* - an mhealth tool and digital platform to facilitate community-based monitoring

- Platform to collect real-time patient feedback on availability, accessibility and quality of TB services
- 5 countries supported – co-financing between USAID and Global Fund

**An Initiative Empowering People with TB and Driving Social Accountability**

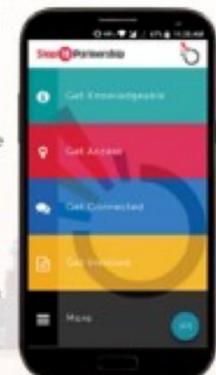

OneImpact digital solutions are: empowering people with information on TB, creating virtual spaces for TB actors to connect and share information, and facilitating community-based monitoring in TB. OneImpact is also supported by resources and tools to guide country implementers to adapt, design and roll out OneImpact for their own purposes.

hosted by  
**UNOPS**

The Stop TB Partnership is leading the way to a world without tuberculosis (TB). Founded in 2001, the Partnership's mission is to serve every person who is vulnerable to TB and ensure that high-quality diagnosis, treatment and care is available to all who need it.

### Key Features

- Get Knowledgeable**
  - TB Treatment Adherence Support
  - TB Science
  - Messages from the TB affected community
- Get Involved**
  - Report challenges with TB service access and quality
  - Provide the evidence
  - Stay anonymous
- Reports and Trends**
  - Generate downloadable reports against project indicators
  - Design and circulate surveys

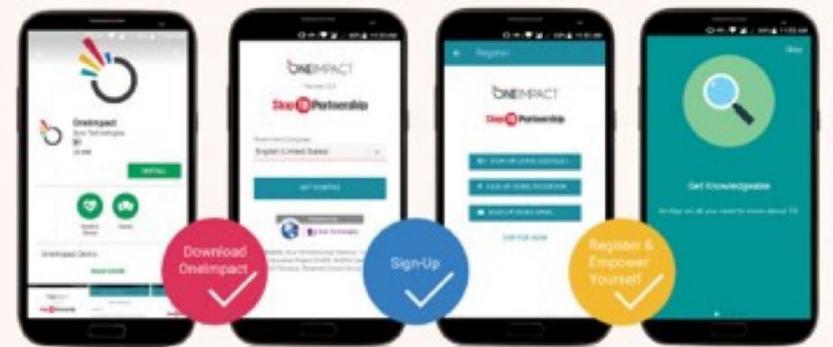

- Get Access**
  - Find the nearest TB health facilities
  - Access information about the TB facilities
- Get Connected**
  - Connect to TB Peers and Support Groups
  - Connect to other TB actor
- Interactive Dashboards**
  - Track challenges being reported
  - Develop feedback loops and accountability mechanisms
  - Map frequency and location of challenges reported

### 3 Steps to Quick Start

**QUESTIONS?** [communications@stoptb.org](mailto:communications@stoptb.org)

Contact Stop TB Partnership if you interested in learning more.

## Demand Generation through CFCS

*Challenge Facility for Civil Society* grants to all SI countries to boost demand and access to TB services.

- 14 total countries supported – through co-financing between Global Fund and USAID
- 13 GF-SI countries have grants currently implementing

### Challenge Facility for Civil Society Round 8

**Grantee Profile**

**YKI Indonesia**

“ Reducing TB self-stigma in Jakarta ”

Organisation	Yayasan KNCV Indonesia
Location	Jakarta, Indonesia
Population Reach	25 TB survivors and people with TB in Jakarta
Timeline	May 2018 - May 2019
Contact Person	Dr. Jhon Sugiharto, Executive Director

**PROJECT OBJECTIVES**

- To deliver, adapt and assess the impact of new self-stigma reduction strategies and interventions among 25 TB survivors and people with TB in Jakarta

**PROJECT ACTIVITIES**

- Train and support local facilitators to implement the self stigma reduction toolkit among people with TB and TB survivors
- Assess the outcome / impact of the toolkit on self-stigma, shame and related measures among people with TB and TB survivors
- Develop a case study, documenting the process and outcome

Contribution to the Global Plan to End TB target(s)

- Reach at least 90% of all people with TB and place them on appropriate therapy.
- Achieve at least 90% treatment success for all people diagnosed with TB through affordable treatment services, adherence to complete and correct treatment and social support.

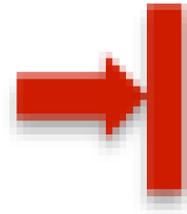

Links to National Priorities and the TB Strategic Plan

The project aims to support the realization of NSP Objective 5 "Improvement of the involvement of community in TB control" by increasing the engagement of people with TB, TB Survivors and affected families and communities in the TB response, specifically in case finding and treatment adherence support.

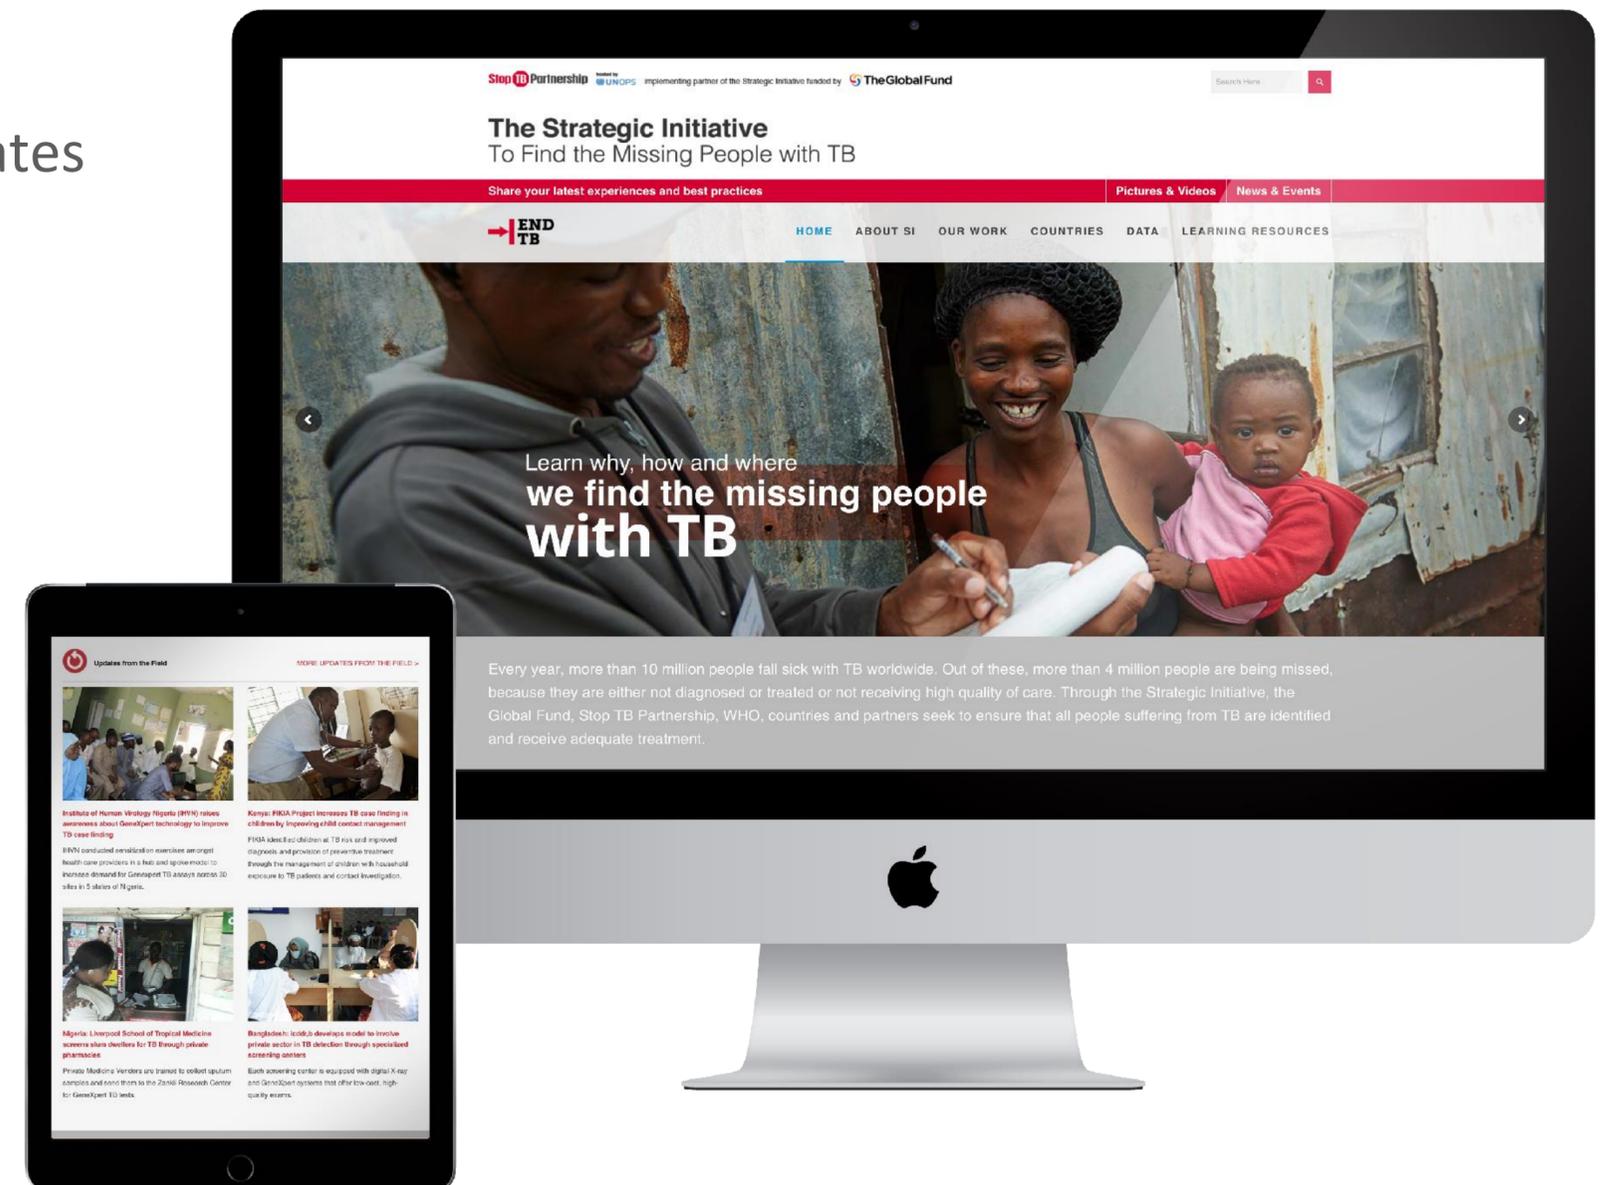

Links to Finding the Missing People with TB

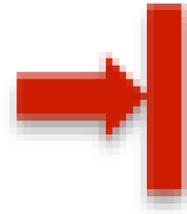

By addressing self-stigma as it relates to TB, the project aims to support people through treatment and their retention in care.

## Advocacy and Knowledge Dissemination

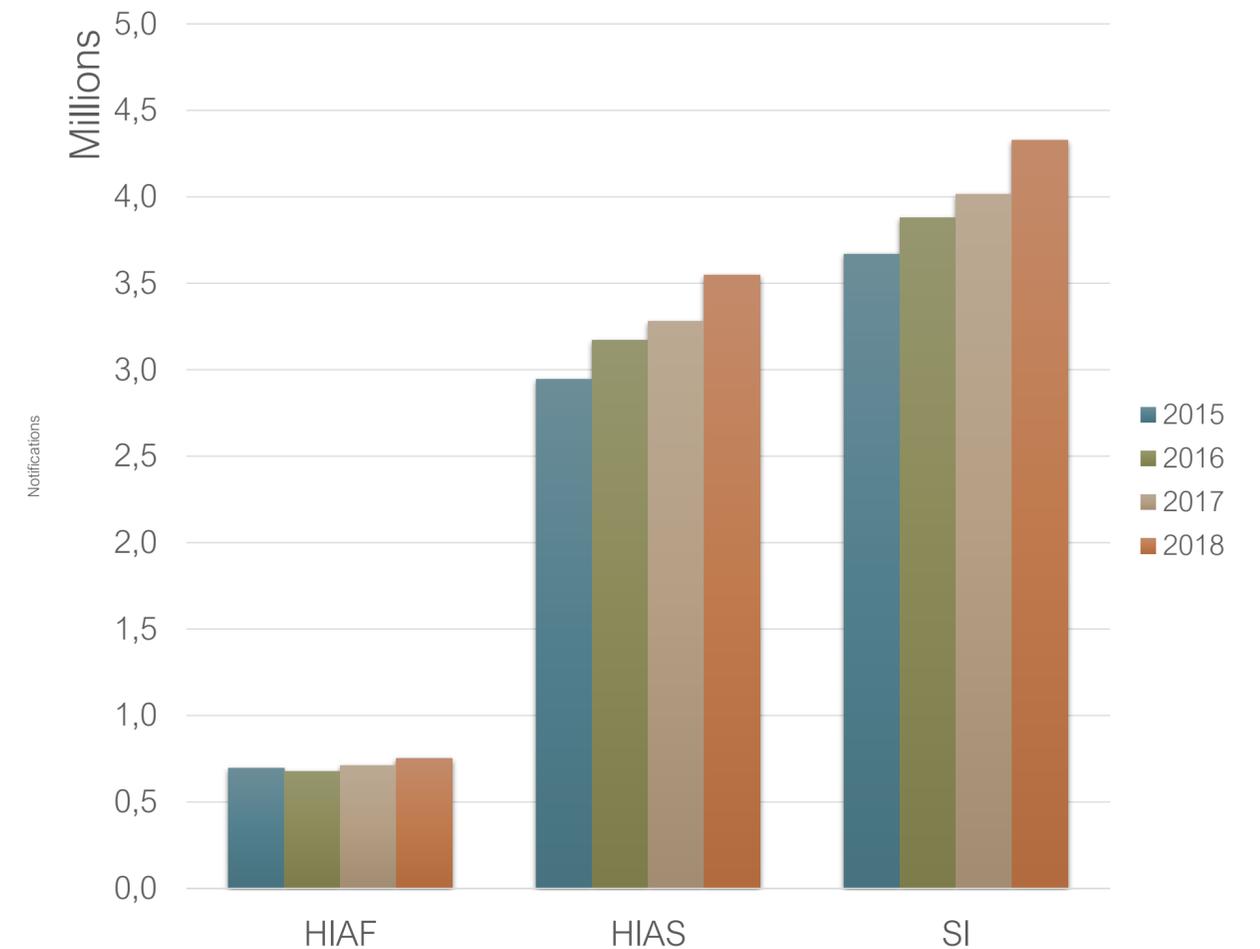

- High-level country visits
- Platform for periodic dissemination of “Updates from the Field” from SI countries:  
<http://stoptb-strategicinitiative.org/>
- Development of “E-learning program” for capacity building
- Results dissemination and lessons learned – hosting global and regional meetings

## Progress

- High Impact Asia
  - On track to reach over 1 million more cases in 2019 than in 2015
  - Most countries close to 90% of GF targets
  - Heavy focus on private sector
- High Impact Africa
  - Kenya and Tanzania reversing negative trend in TB notifications
  - Nigeria and S. Africa beginning to ramp up interventions with new grants
  - Mozambique steady increasing TB notifications
  - More work needed in the region to meet ambitious goals in individual country targets and NSPs
